PRODUCT DESCRIPTION

New high speed double paper cup forming machine is a fully automatic paper cup forming machine, which can automatically feed paper through multiple rows, paper anti-backing device (to ensure accurate positioning), ultrasonic welding, transfer of mechanical paper tube, bottoming, folding bottom, Pre-heating, knurling, unloading and other continuous processes can stably produce paper cups of various specifications.

RIDERS GROUP

Main feature

1. The whole steel plate fuselage, interlayer paper feeding design and the style of oil poured lubrication system is Ensured the equipment long-term normal and Stable Work;
2. Short distance double vertical axis combine advanced and high-precision cylinder open type cam drive make every stations high-speed worked accurate without mistake;
3. Single wrap the leaf groove cam structure combine seesaw roof bar design can make the high-speed paper feeding go to the place accurately;
4. Exquisite original creation 490mm mould turn plate design make the equipment work load more light and the speed to be more fast;
5. Scientific and reasonable mechanical is fit Itinerary design can using in premise of exchange mould can make the products producing range 1oz-16oz ;paper thickness 170g-350g .

DETAIL PRESENTATION

DETERMINE SUCCESS OR FAILURE

01

PREFERRED MATERIALS

Excellent materials, meticulously crafted, easy to operate, and easy to use

02

STABILITY PERFORMANCE

Experienced, stable and reliable, easy to use, and strong load-bearing capacity

03

RELIABLE QUALITY

Each product is strictly produced according to requirements, making you more confident

04

SAVE MANPOWER

Fully automatic paper suction and feeding, heating and forming, automatic bowl output

RIDERS GROUP

Middle Speed Paper Cup Forming Machine:

Smart middle speed paper cup forming machine is provided with advantages of high performance, high efficiency and high quality.

The overall steel plate machine body and oil-spraying lubrication system ensures normal and stable long-term operation of the equipment.

High Efficiency and Energy Conservation:

Advanced high-precision cylindrical cam driving unit working with gear drive system make sure the precisely working of every station.

Bottom paper feeding controlled by servo tracking system, and raw material paper can be saved effectively.

Foreign technical and Made in China:

Paper bottom heating system (Switzerland Leister) uses 2 steps flameless heating.

Every step in production is monitored by photocell (Japan Omron) and be reported.

User-friendly design:

The function of machine is controlled by human-computer interface and PLC system.

Manual operation can be replaced by automatic paper cup counting and collection table with appropriate setting.
